Mitigate Commercial Risk When Taking Over a Project

Are you considering taking over a part completed construction or civil engineering project after a contractor has gone into administration or left site? If so, let us tell you about the importance of having a bill of quantities.

When considering taking over a project from a contractor that has gone into administration or has left site, one of the first questions is; how much work is there left to do and what is the value of that work?

That's where a bill of quantities becomes an invaluable document to have produced to assist you in making the final commercial decision of taking the project over.

The process is very fast and efficient to get your desired answer in a matter of days, or even hours if necessary.

Simply provide us with an electronic set of the documents including drawings and specifications. The documentation must detail the full extent of the work already completed (photographs or videos are ideal), and also an explanation of the scope of work outstanding.

Within a matter of days, we will have back to you the completed bills of quantities to enable you to reach a rapid decision.

The presented bills can be in any format you require, and we can provide you with fully detailed substantiation of how we have arrived at any of the quantities.

Bags of Generosity from Staff!!!

The Buddy Bag Foundation was founded in 2015 to help make a difference to children entering emergency care. 48,000 children require emergency care every year in the UK. The foundation supplies these children with a Buddy Bag containing essential items to help restore a sense of comfort and love.

Staff at Mynott Bowers (UK) recently rallied round to pack 25 rucksacks to donate to the The Buddy Bag Foundation this week.

A Buddy Bag backpack contains essential items a child needs including: toiletries, pyjamas and underwear, in addition to comfort items such as a book and a teddy. A Buddy Bag is something a child can call their own, no matter where they go.

The foundation provided the backpacks and shopping lists of essential items in age ranges from newborn up to 16. With the generosity of the staff, the 25 bags were filled and ready for delivery.

Find out more about The Buddy Bag Foundation, visit the website here: www.buddybagfoundation.co.uk

Leaders in Producing Bills of Quantities for the Construction and Civil Engineering Industries.

Mynott Bowers Group is a team of highly skilled Quantity Surveyors specialising in providing high-quality Bills of Quantities to main contractors worldwide.

Experts in standard methods of measurement for construction and civil engineering projects including ASMM, SMM7, NRM2, POMI, CESMM, MMHW, RMM2, ARM as well as bespoke formats.

Whatever the size or complexity, the project will benefit from the team's dynamic approach and experience across all industry sectors.

The Future is Green for Mynott Bowers

Mynott Bowers (UK) recently published their Annual Sustainability Report for 2022. The report is generated by sustainability partner, Zellar provides invaluable insights enabling the organisation to take a proactive approach towards achieving sustainability goals whilst being able to measure progress along the way.

Zellar's report provides a detailed breakdown of company emissions for 2022.

It outlines sustainability measures already implemented and highlights outstanding actions.

Managing Director Derek Mynott said: "We are committed to reducing our carbon footprint and have taken significant steps towards achieving this goal. By working closely with Zellar we have explored a range of strategies that can help us reach our objective in the most effective way possible."

"The organisation and it's staff are fully committed to being the leading supplier of Carbon Neutral Bills of Quantities."

"We're putting our determination into action by taking concrete steps to reduce our carbon footprint and ensuring our Bills of Quantities align with this commitment."

"We strongly believe that this is not only the right thing to do for the environment, but also the long-term sustainability of our business."
